## LLumar American company

Eastman Chemical is the owner of the LLumar's plant, one of the largest and most integrated companies in the production of window insulation films in the world. Our insulation films feature premium quality in terms of manufacturing and design which is produced to last forever.

LLumar was established in America in 1977. Today, it exists in more than 100 countries to promote aspects of beauty, energy, efficiency, comfort, security, and safety. LLumar window films protect and improve houses, facilities, and vehicles. We work directly in cooperation with architects, designers, and clients to ensure that our products directly meet market requirements. We confidently support every LLumar product with a factory-backed warranty.

Through window films business, Eastman creates products that improve the effectiveness and performance of glass windows. It also introduces the latest technology in window films, which are produced in a cleanroom manufacturing environment to ensure optimum quality. Eastman has a 55-year experience in window films production and technology,

It is also dedicated to continuously invest in machinery, technology, and personnel training to maintain its position at the forefront of the industry. Our quality policy states that European performance films have a certified quality management system that complies with ISO 9001:2008
